

Sir Victor Hotel

Sir Victor Hotel's unusual limestone façade peels back to reveal function-driven design and a sophisticated culinary scene. Incorporating Barcelona's vibrant street scene with the color schemes of the sea and the mountains, the designers have created a world that feels grounded by the city yet one that is also imbued with the lightness of the ocean. Angled windows frame the lovely views while allowing direct sunlight to flood in. Entering their wide light-filled rooms, guests immediately feel the perfect marriage of form and function.
