

FREIgeist Göttingen Innenstadt

Spearheading a new hospitality movement in Germany's famed university town of Göttingen, FREIgeist Göttingen Innenstadt is a creative hub for artists, world travelers, and eternal students of life. The architects have intentionally crafted a brick façade in an apparently wild pattern to stress both the contemporary nature of the building and the district in which it's set. A design highlight is the hotel's external green areas, which will serve to connect the entire district when it has achieved full maturity.
